● Resolution 24 Sponsored by Senator Stinson

- Opening statement: Resolution talks about Stinson's fraternity brother who died of cardiac arrest and if someone around him knew CPR, he would not have died. This resolution started a heart health initiative that puts CPR safety in dorms and across campus. Wants to have event on campus that is able to detect early on heart problems.

- Senator Preshia's family has previous heart condition problems and is in full support.
- Senator Randall, non-committee member speaks, great example of a statement that is being turned into action. Sweepings passed money to EKG'S and worked with housing for AED'S in campus dorms.

- Senator Murray moves to pass by acclimation, Nemeth seconds.

**YES: ( ) NO: ( ) ABS: ( )**  
**PASSES BY ACCLIMATION**

- Resolution 26 Sponsored by Senator Stinson and England

- Opening Statement: There is a lot of numbers in this resolution and the local fees are made up of the A and S fees. Every year the student body treasurer runs a local fee committee that hears requests from departments who will receive funds. This year, all is looking good, however, Athletics threw a curve ball and did not tell us they needed an increase for the Athletics fee. Withdrawing resolution because A and S fees have to completely redo their plan of who to give money to.

**WITHDREW RESOLUTION**

- Resolution 28 Sponsored by Senator Little and Marcus

- Opening statement: Senator Marcus This bill addresses the bill going through the Florida House that is trying to repeal Bright Futures and how some majors will not apply to bright futures. Senator Little stated this bill is threatening to Florida State students in the house.
- Senator Hitchcock motions to roundtable, Hunter Seconds.
- Senator Hunter asked what was the specific change that the bill went through in the education committee in the house.
- Senator Marcus stated it was not completely removing it but not funding it as much
- Amended second whereas clause and removed the word “remove”
- Senator Hitchcock moves to amend co-sponsors and adds Senator Randall.
- Senator Marcus stated that if you receive college credit in high school, this bill in the house would deduct money from your bright futures. This bill harms high-achieving students
- Senator Hunter is pro of this resolution.
- Senator Flashman stated that Bright Futures is incredibly important and needs to stay in tact.
- Closing Statement: Senator Little stated that taking away bright futures would allow Florida talent to leave Florida. Bright futures is crucial to Florida and the bill in the house destroys that. Senator Marcus stated that this house bill was very concerning. This bill does not realize that every major is important and not everyone is set out to be a STEM major.
