 - Humanism in healthcare is characterized by a respectful and compassionate relationship between physicians, as well as all other members of the healthcare team, and their patients. FMA will host a panel of speakers with diverse backgrounds and experiences that reflect the attitudes and behaviors sensitive to the mission of respect for others. Evidence has shown that compassion and empathy are critical components of good medicine and with improved health outcomes for the patients. So having this lunch and learn will be a great way for students to interact with current GHHS members and learn about ways they are improving the humanistic aspect of medicine through service.
